DETAILED ACTION

Allowable Subject Matter

Claims 1-12 are allowed.

The following is an examiner's statement of reasons for allowance: The prior art of record fails to teach or anticipate the claimed limitation of a camera motion estimation apparatus for extracting a camera motion made at the time of photographing from a photographed moving picture comprising a motion vector extraction unit for extracting motion vectors from the blocks using the horizontal and the vertical mean picture data and a camera motion estimation unit for estimating a camera motion using the motion vector data. This limitation taken in conjunction with the other claimed limitations makes the claims allowable over the prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Kondo (US 6266371) discloses a motion vector detecting apparatus with detection based on comparison with a present frame and an inspection block of a reference frame.
